Totals

1	Appreciate and express the art and science of interaction design, including its theories, principles, methodologies, and role in software design and development.							+	0
1a	Understand and express how interaction design relates to mental models.		-			O			3
1b	Understand and state the five key usability metrics and how to record or capture them.		-			O		/	5
1c	Understand and describe: interaction design guidelines, principles, & theories; interaction styles; and affordances & natural mappings.		-			O		-	0
								O	7
2	Understand and report on how humans behave and interact with the user interfaces of real-world systems and software.								
2a	Conduct and document a real-world study of how a cohort of users responds to a particular user interface, including but not limited to capturing and prioritizing usability metrics and correlating results to mental models and interaction design theories.		-			O			
2b	Effectively use: usability metrics; interaction design guidelines, principles, & theories; interaction styles; and affordances & natural mappings to make appropriate, well-founded interaction design decisions.		-			O			
3	Demonstrate the fundamentals behind designing and implementing user interfaces.								
3a	Know and understand how user interfaces are constructed.			/	-			/	
3b	Know and understand event-driven programming.				/		/	/	
3c	Know and understand the model-view-controller (MVC) paradigm.			/	/		+	/	
3d	Break down a high-level user action into a sequence of lower-level user or system events.								
4	Follow academic and technical best practices throughout the course.								
4a	Write syntactically correct, functional code.			/	-		/	/	
4b	Demonstrate proper separation of concerns, especially MVC.			/	/		/	/	
4c	Write code that is easily understood by programmers other than yourself.				/		+		
4d	Use available resources and documentation to find required information.	+	/	/	-	O		O	
4e	Use version control effectively.	+		/	/	O	-	O	
4f	Meet all designated deadlines.	+			-	-	+
